

Don't let your child catch it

– make sure they get the MMR vaccine

The number of young people catching measles has risen across Europe and the UK. Children are offered MMR vaccine to protect against measles, mumps and rubella just after their first birthday and a second dose at 3 years 4 months. For the best protection they need both these doses.

It's never too late to be vaccinated.

For more information contact your local GP surgery or visit: pha.site/mmr

If you need to contact an emergency or out of hours service, it is important to phone ahead if you are experiencing any of the signs and symptoms of measles.
